# Bandag RW-DRIVE 001

## Regional Winter Drive – Trucks, coaches, and city buses

### High performer in winter operations

Thanks to the winter pattern design and 3PMSF-marked.

### All-year usage

With its evolving tread, the Bandag RW-DRIVE 001 has been optimised for year-round usage for regional and urban driving.

### Boosted traction performance over tyre life

Thanks to new sipe configuration<sup>1)</sup>, the Bandag RW-DRIVE 001's unique tread pattern provides improved balanced performance (wear/traction) and a high level of traction in accordance with all seasons needs, without having to change tyres.

Fleet managers want to keep their fleet of trucks, coaches, and city buses on the roads, without the need for seasonal tyre changes, even when the weather shifts from rain and mild snow in winter to sun and showers in summer.

This is why Bandag has developed the premium Bandag RW-DRIVE 001 tread, the successor to the Bandag W990+ tread.

The optimised design of this premium quality winter tread is ideal for regional and urban driving year-round. Its unique pattern evolves from a pure winter tread to an all-season tread as it gets worn, providing boosted traction performance in all seasons without having to change tyres.

It achieves this by integrating Bridgestone's advanced technologies, such as the sipe geometry which includes deep sipes, sipe tie-bar, and sipe density reduction, which ensure the Bandag RW-DRIVE 001 tread delivers long-lasting snow traction without compromising wear life.

Furthermore, the tie bars between the tread blocks in the shoulder area increase the circumferential stiffness. As a result, heel and toe wear is reduced across the entire pattern, making it last longer and providing better driving comfort.

The Bandag RW-DRIVE 001 is the perfect tread to extend the life of the new Bridgestone RW-DRIVE 001 as well as other premium tyres.
