BDR-WXT

Extreme performance for
extreme winter conditions

Part of the Bridgestone Group

Bandag BDR-WXT

Drive - Regional - Winter Extreme

Advanced winter retread
extending the service life of winter tyres.

Outstanding traction on
snow and ice for reliable
winter performance.

Optimal mileage potential
thanks to advanced compound.

Excellent safety & stability
featuring innovative Bridgestone
technologies.

When the weather takes a turn for the worse, you need a winter tread with the power to drive your business through even the most extreme conditions. The Bandag BDR-WXT retread was specifically designed with the needs of year-round lumber operations in mind. Employing state-of-the-art pattern and compound technologies developed by Bridgestone to ensure outstanding grip and secure handling on ice and snow, together with outstanding durability and optimal wear life. So you can get more out of your tyres and keep your business moving, all year round.

The Bandag BDR-WXT's advanced tread design is especially adapted to challenging wet and winter conditions. Delivering superb traction for reliable braking and acceleration on wet, icy and snow-covered roads. Its unidirectional pattern, for instance, is engineered for responsive wet-weather handling while Bridgestone's patented snow pillar technology boosts snow retention and grip on snow and ice. And since it is adapted to the varying conditions of lumber operations, you can also count on optimal mileage performance! With integrated tie bars that deliver high block stiffness and cut down on both irregular wear and the need to rotate tyres. Helping you get even more out of your valuable casings and your business.

The Bandag BDR-WXT tread's M+S and Alpine markings also guarantee full compliance with winter tyre regulations across Europe, while ensuring reliable, all-season safety and performance in wet and winter conditions.

As part of Bridgestone's Total Tyre Life concept, the Bandag BDR-WXT winter retread extends the service life of your Bridgestone and other premium winter tyres. Ensuring safe, reliable winter performance while lowering the total cost per km of your tyres.

Total Tyre Life is built around Bridgestone's premium new tyres and Bandag retreads, the best match to extend tyre life and reduce cost per km.
