

BANDAG[®]
BDR-C

Traction and comfort when you need it most

Bandag BDR-C

Drive Regional - Coach

All-season comfort and safety

M+S pattern ensures smooth and safe ride for passengers.

Great traction in winter conditions

Up to 5% more than its predecessor BDA4.

Excellent resistance to irregular wear thanks to the application of Bridgestone technologies.

Long life resulting from an advanced tread technology and high performing compound.

Passengers travelling on coaches expect nothing but the best: a smooth, safe and comfortable ride, irrespective of the season and the weather. Coach treads also face the additional challenges that they need to perform optimally over longer distances as well and on a variety of road surfaces. The selection of the right tread is crucial to meeting this demanding set of requirements. The Bandag BDR-C tread is the ideal solution.

This Bandag application-specific tread, developed predominantly for coaches, also meets the different demands of urban transportation, where silent running is particularly appreciated. Wherever used, the BDR-C tread improves passenger comfort and safety. In addition, it displays outstanding resistance to irregular wear and all-season good traction performance.

The BDR-C tread features the Bridgestone *Tie-Bar* technology, which results in increased stiffness and minimised heel and toe wear. This leads to a multitude of benefits. Tyres last longer and ensure excellent noise comfort.

Choose the Bandag BDR-C tread for all coaches, for high comfort levels at all times and optimum traction when you need it.
