

**BANDAG<sup>®</sup>**  
**BDR-HT4**

*The new high mileage and cost efficient regional tread from Bandag*

**NO DETOURS.™**

# Bandag BDR-HT4

## Drive Regional - Highway

### Excellent mileage performance

up to 20% more than the BDE2.

### Maximum cost efficiency

longer tyre life reducing the cost per kilometer.

### Great resistance to irregular wear

thanks to the application of Bridgestone technologies.

### Low stone retention

for a better protection of the casing.

Trucks dedicated to regional transport are often exposed to tough driving conditions: changing road surfaces, varying loads, frequent overloading, all imposing some specific demands towards tyre quality and robustness.

The Bandag BDR-HT4 tread perfectly copes with these requirements and is offering safety to the truck driver, thanks to an excellent grip and very good traction in all circumstances.

The Bandag BDR-HT4 tread features the *Tie bar* technology as well as an *improved sipe design*, minimizing heel and toe wear. This also gives a longer tyre life, and therefore reduces tyre maintenance costs and tyre noise level.

With this Bandag Application specific tread, we offer a cost efficient solution for all your regional/highway drive application.
