trailer tread from Bandag*

NO DETOURS.™

Bandag BTR-WB & BTR-WB+

Trailer Regional - Highway

New shoulder design

Excellent mileage

Like-New appearance

Proven reliability

Trailer tyres have a hard life. They are exposed to continuously changing load and road surface conditions, and are repeatedly exposed to rough operating conditions like short turns.

The Bandag BTR-WB & BTR-WB+ are the result of a perfect match between compound and design optimisation, and fulfill all the needs of this harsh application.

The BTR-WB & BTR-WB+ feature a well-balanced performance both in regional and highway applications, without compromising the tyre performance.

The new shoulder design* deals well with the frictions of short turns, reducing shoulder tear and extending tyre life.

Their lower tread depth results in a lower rolling resistance, and therefore, lower fuel consumption.

Total Tyre Life is built around Bridgestone's premium new tyres and Bandag retreads, the best match to extend tyre life and reduce cost per km.
