NO DETOURS.™

Bandag M729EVO

Drive Regional – Highway

Long life

Thanks to advanced tread technology and high performing compound.

All-season safety

M+S pattern with good traction in wet and mild winter conditions.

Excellent resistance against irregular wear

thanks to the application of the Bridgestone technologies.

Regional transport may mean shorter trips, but it doesn't mean truck drivers don't encounter a variety of driving conditions. The tyres bear the effects of these changes more than any other part of the vehicle. They must be able to withstand the wear and still offer optimal performance. At Bandag, we make sure they do.

The Bandag M729EVO tread perfectly meets these conditions and offers safety to the truck driver, thanks to a good grip and very good traction in winter conditions. This deep multi-block tread pattern provides excellent mileage performance for all on-road applications.

The Bandag M729EVO regional drive tread is derived from the successful Bridgestone M729 new tyre. It integrates the *Convex Block Design* which lowers stress at the block edges, dramatically reducing heel & toe wear. This also extends the lifespan of the tyre, and therefore minimises tyre maintenance costs and tyre noise level.

The M729EVO is the perfect tread to extend the life of the Bridgestone M729 new tyre.
