

NO DETOURS.™

Bandag M788 (E)

*The all-seasons coach bus tread
from Bandag*

Bandag M788 (E)

All Position Regional - Highway

Impressive mileage performance

up to 10% more than BDA4(E) and BDA4 with same tread depth.

All-seasons safety

with good winter traction when newly fitted, and quiet enough to be run all year round.

Versatility

Mainly for regional usage, but also for highway and city bus applications.

Like-new appearance

Great product appearance thanks to the Bandag ECL curved section.

Featuring Bridgestone technology!

The Bandag M788(E) is derived from the well-known Bridgestone M788 new tyre, and exclusively incorporates similar technologies:

- The *variable depth sipes* provide extra grip in wet and cold weather conditions, while still retaining the stability of a rib pattern tyre.
- The *convex block design* reduces stress at the block edges, drastically cutting heel & toe wear and hence reducing the need to rotate tyres and improving vehicle uptime.
- The *groove fences*, flexible partitions in the tyre's grooves, reduce the noise produced by air bumping, increasing passengers' and driver's comfort.
- The *dual sipes* further improve wet/winter performance and reduce stone retention.
- The *equaliser rib design* minimises irregular wear occurring on the tyres' inner ribs, giving a longer life.
