*Change roads, not tyres*

# Bandag R-DRIVE 001

## Drive Regional - Highway

### Versatility

Mainly for regional usage, but also for highway and light On/Off operations.

### Excellent mileage performance

Up to 25% more than the BDE2.

### Great resistance against irregular wear

Thanks to the application of Bridgestone technologies.

### All-seasons safety

M+S pattern, with good traction in winter conditions.

Trucks dedicated to regional transport need to cope with a large scale of operations, from highway, to light On/Off operations, with changing operating conditions, and frequent overloading.

The Bandag R-DRIVE 001 tread features the *Tie bar* technology, equalizing pressure distribution, and therefore minimizing heel & toe irregular wear. This results in a longer tyre life, lower maintenance costs and more silent running.

The R-DRIVE 001 is an *unidirectional* pattern. This improves the level of wet handling and braking for a better comfort and safety.

The Bandag R-DRIVE 001 is the perfect tread to extend the life of the Bridgestone R-DRIVE 001 new tyre.
